

An Introduction to the Evans Gambit
Richard Westbrook, 2006.

The Evans Gambit originated in the 1820's and for decades struck terror in the hearts of defenders. It arises out of the Giuoco Piano and is an attempt to gain the initiative in the center at the cost of a pawn. After,

1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5, the Evans Gambit begins with **4.b4!?** British sea captain W.D. Evans's idea is based on decoying the Bc5 from defense of d4 and owes some of its strength to the fact that Black's usual freeing move, ...d7-d5, is not feasible. White hopes to set up a strong pawn center immediately and often uses Ba3 to prevent Black from castling, or at least slow him down. Play usually continues

4... Bxb4

It doesn't make much sense to capture with the knight –

4... Nxb4
5.c3 Nc6
6.d4 exd4
7.0-0! ...

7.cxd4 Bb4+ 8.Bd2 is OK for White.

7... Nf6

7... dxc3
8.Bxf7+ Kxf7
9.Qd5+ Ke8
10.Qxc5 d6
11.Qxc3 Qf6
12.e5 (12.Qa3)

8.cxd4 Be7

For the price of a pawn, White has a "dream" position! See the last Sample Game.

5.c3 Ba5

Black sometimes plays 5...Bc5 but keeping the bishop on the a5-e1 diagonal is stronger.

6.d4 [or, 0-0] exd4?!

Black is tempting fate. This capture is not good; strong players will do something else. However, inexperienced players may. In any case, you need to know the attacking themes which are the foundation of the opening.

In the late 19th Century, Emanuel Lasker found a way to improve Black's chances. After 6...d6, if

A) 7.0-0!? Bb6! (Lasker's Defense)
8.dxe5 dxe5
9.Qxd8+!?* Nxd8
10.Nxe5 Be6 leads to an ending where Black's pawn structure will be superior to White's.

*White should try

9.Qb3! Qf6
10.Bg5 Qg6
11.Bd5 Nge7
12.Bxe7 Kxe7
13.Bxc6 Qxc6
14.Nxe5 Qe6
15.Nc4. Unclear.

B) So instead of castling immediately, White should strike at Black's weaknesses before the center is cleared -

7.Qb3! Qd7
(7...Nxd4! is a rare, but good continuation.)
8.dxe5 Bb6
9.Nbd2** regains the pawn and keeps some attacking chances. - R Fine. For example,

White's advantages are kingside pawn majority; lead in development; B v. N.

**Instead of 9.Nbd2, White can try

9.Bb5!? a6
10.Ba4! Bc5
(to recapture with the bishop, threaten ...b5, and prevent Ba3.)
11.c4 (stops ...b5, but allows) dxe5
12.0-0 Nge7
13.Nxe5 Qd6
14.Nd3 Bd4
15.Nc3 0-0
16.Ba3 Qf6
with a fairly equal position.

** And, not the weak 9.exd6!? Na5.
